### DETAILED ACTION

1. This application is a CIP of 10/101,681. This is the first action on the merits.

Claims 1-20 are pending.

### *Information Disclosure Statement*

2. The IDS, filed 11/20/03, has been considered in full.

### *Drawings*

3. The drawings, as originally filed, are acceptable as formal.

### *Double Patenting*

4. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

5. Claims 10-13 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 9-12 of prior U.S. Patent No. 6,725,976. This is a double patenting rejection.

Claim 12	Claim 12
Claim 13	Claim 10

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 14-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 13-19 of U.S. Patent No.

6,725,976. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference is "torsion spring" vs. "clock spring".

The instant application claims "a clock spring" [see claim 14, line 11]. The patent recites "a torsion spring" [column 9, line 51]. It is the Examiner's position that these are just two different ways of saying the same thing. There appears to be no difference between the two recitations.

***Claim Rejections - 35 USC § 102***

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-3, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by 5,310,021 (Hightower).

Hightower shows the claimed invention including a motor (30) driven gear system (35) which is spring (31) returned; the device having a manual override (as at 25) which could be used to manually actuate the system. The device being operative to drive a damper for a ventilation system.

***Allowable Subject Matter***

10. Claims 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

Art Unit: 3682

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art not relied upon shows gear train arrangements which are manually or electrically operated.
